

Backend Node.js Intern

Location: Remote / On-Site (Kathmandu, Nepal)

Experience Level: Internship (Freshers Welcome)

Job Description:

We are looking for a motivated and enthusiastic Backend Node.js Intern to join our development team. As a backend intern, you will work closely with senior developers to build and maintain server-side logic, APIs, and database systems for our applications. This is an excellent opportunity to gain hands-on experience in a fast-paced, collaborative environment.

Responsibilities:

Develop and maintain RESTful APIs and server-side logic using Node.js.

Collaborate with front-end developers to integrate user-facing elements with server-side logic.

Work with databases such as MongoDB or MySQL to store and retrieve application data.

Debug, test, and optimize code to ensure high performance and scalability.

Assist in implementing security and data protection protocols.

Participate in team meetings, brainstorming sessions, and code reviews.

Requirements:

Currently pursuing or recently completed a Bachelor's degree in Computer Science, Software Engineering, or a related field.

Familiarity with JavaScript and Node.js.

Basic understanding of RESTful APIs and MVC architecture.

Knowledge of database systems like MongoDB, MySQL, or PostgreSQL.

Familiarity with version control systems (e.g., Git).

Strong problem-solving skills and a willingness to learn.

Bonus: Experience with Express.js, JWT authentication, or cloud platforms like AWS.

Perks:

Opportunity to work on real-world projects.

Mentorship from experienced developers.

Flexible working hours.

Letter of recommendation and potential for a full-time role based on performance.

Start your career in backend development with hands-on experience and mentorship from industry experts!
