Job Description: Quality Assurance Intern

Position: Quality Assurance (QA) Intern

Location: Kathmandu, Nepal

Employment Type: Internship

Department: Software Testing & Quality Assurance

About the Role:

We are looking for a motivated and detail-oriented Quality Assurance Intern to join our team. As a QA intern, you will be responsible for ensuring the quality of our software products by performing manual testing, creating test cases, and collaborating with developers to improve software reliability. This role is an excellent opportunity for someone with a strong foundation in software testing principles and a passion for delivering high-quality applications.

Responsibilities:

�✓ Conduct manual testing to identify software defects and usability issues.

✓ Assist in creating, executing, and documenting test cases for different software modules.

✓ Work with developers and the QA team to understand requirements and provide constructive feedback.

✓ Use version control systems (Git) to track and report software defects.

✓ Perform basic automation testing using Selenium to improve efficiency.

✓ Apply basic SQL knowledge to verify and validate data in the database.

✓ Participate in team meetings, knowledge-sharing sessions, and training programs.

✓ Continuously learn and enhance skills in software quality assurance.

Requirements:

✔ Currently pursuing or completed a Bachelor's degree in Computer Science (BSC.CSIT) or a related field.

✔ Knowledge of manual testing, test case creation, and software testing principles.

✔ Familiarity with basic automation testing tools (Selenium), SQL, and Python.

✔ Strong analytical thinking and problem-solving skills.

✔ Excellent communication skills and attention to detail.

✔ Basic understanding of version control systems (Git).

✔ Ability to work in a team-oriented and collaborative environment.

Preferred Qualifications:

★ Previous internship or project experience in software testing.

★ Experience working on web-based projects, such as e-commerce platforms.

★ Participation in IT clubs, hackathons, or software development events.

★ Volunteer experience in technology or community-based programs.

Benefits:

☞ Hands-on experience in real-world software testing.

☞ Opportunity to work with experienced developers and QA professionals.

☞ Learning and development sessions on automation testing, bug reporting, and software QA methodologies.

☞ Certificate of completion at the end of the internship.

☞ Potential full-time job offer based on performance.
